Solutions

# Washington Federal Practice

PricewaterhouseCoopers serves the federal government through our Washington Federal Practice (WFP). With over 2000 professionals based in the Washington Metro Corridor, WFP's mission is to become the U.S. Federal Government's preferred provider of advisory and assurance services. We help government agencies solve complex business issues, manage risk and add value to performance through our comprehensive service offerings in financial management, program management, operations improvement, and security and data management, all of which are delivered seamlessly throughout the world.

We build relationships with our government clients by providing outstanding services based on quality and integrity. Our networks, experience, industry knowledge and business understanding distinguish the way we work. Within our own teams and with our clients, we are collaborative, open and direct. We are not content with standard solutions. We push ourselves and our clients to think harder, to understand all of the consequences, and to consider new perspectives.

## Advisory and Assurance Services

Our clients look to PricewaterhouseCoopers as a leader in providing advisory and assurance services. The WFP delivers advisory services that support the government's move toward a more citizen-centric, performance-based delivery model. As our federal government strives to meet the demands of the nation's citizens, changes are required in developing and supporting department-wide strategies, managing risk and compliance, and harnessing business intelligence and analytical capabilities. Our assurance and advisory professionals bring direct hands-on knowledge of federal standards for systems, internal controls and financial reporting.

## How we deliver value to the Federal government

### Financial Management

Our methodology strives to achieve cross-enterprise financial process integration and alignment to enable cost reduction, increase controls and reliability, and heighten confidence in financial information. We also help federal agencies address accounting, auditing, reporting, systems and internal control challenges and impediments. We help to support federal agencies in:

- Financial & Performance Audit
- Audit Readiness & Remediation
- Budget and Performance Integration
- Financial Reporting & Controls
- Business & Financial Planning
- Property & Asset Management
- Grants and Credit Management
- Fraud Investigation & Recovery

### Risk and Compliance

Governance, Risk and Compliance Solutions provide a comprehensive approach to achieving agency objectives and regulatory compliance requirements. Our approach features an assessment of management processes and risk-based realignment to increase agility in responding to dynamic challenges faced by today's government executives.

- Enterprise Risk Management
- Continuity of Operations
- Ethics and Compliance
- Privacy
- Regulatory Function Management
- Regulatory Reporting and Assurance

## Operational Effectiveness

We help government agencies to assess current operations issues to increase efficiencies and effectiveness, as well as success with appropriate rewards and recognition programs. Our services include:

- Benefits Realization
- Performance Metrics & Management
- Business Process and Controls
- Sourcing and Alliance Management
- Privatization & Outsourcing Advisory
- Economic Advisory
- Human Capital Change Management

## Program Management

PricewaterhouseCoopers' program management services team is an integrated force, responsible for all aspects of our service delivery life cycle model. We provide the tools, methodologies and people to ensure successful delivery of large projects and programs. We have proven success helping government agencies in the areas of:

- Program and Project Management Office Design & Implementation
- Organizational, Program and Project Management Assessment
- Project Portfolio Management Support Services
- Feasibility & Business Case Development & Monitoring
- Acquisition Management Support
- Performance Assessment & Benefits Realization
- Dispute and Investigations Support

## Security and Data Management

We help clients maximize the return on their information technology investments through the alignment of their business processes with their technology activities. We assist them with the creation and management of world-class technology functions, incorporating security, data management and IT business risk management, through:

- Threat & Vulnerability Management including in-depth Penetration Analysis
- Controls & Identity Management including Single Sign-on, User Provisioning, and Access Management
- Incident Response, Event Correlation, and Computer Forensics
- Crisis & Incident Planning and Response
- Data Planning, Management and Quality Services
- Information Security Strategy and Architectural Services
- FISMA and Certification/Accreditation Services.
